

Furnace Sands

Advanced Materials

SURE START®

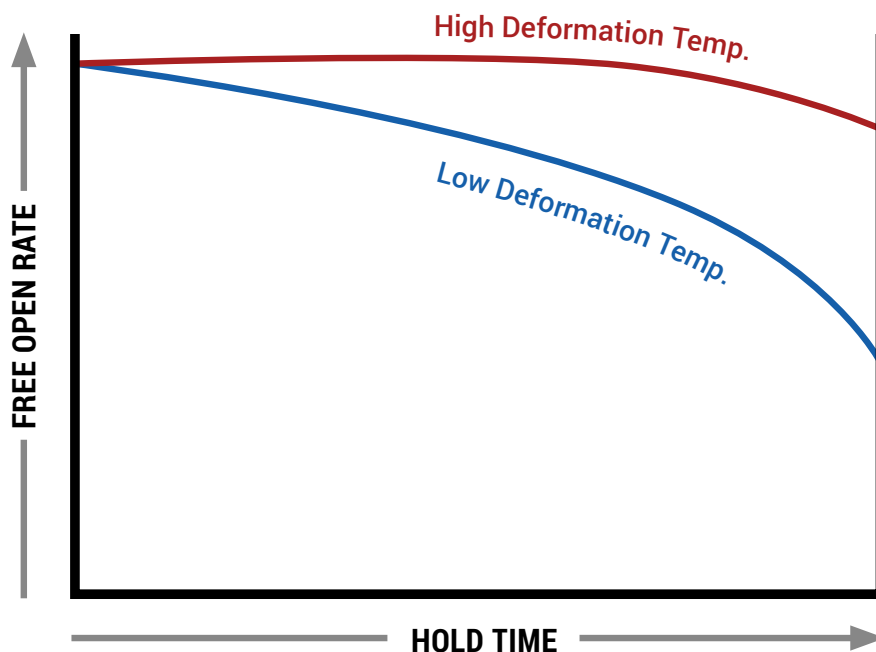

Olivine Based Sands for High Free Open Percentage in the EAF

Sure Start Furnace Sands are engineered refractory blends that optimize continuous free opening when applied to the EAF tap hole consistently through a hopper feeding system. Prince offers various modifications of these high performance sands that help improve process efficiency and offers excellent performance rates. Sure Start is offered in a variety of sizes and options within the United States. For our export markets, we also have an assortment of packaging options available.

SURE START EBT

Engineered refractory blends that optimize free opening of the EAF tap hole.

Proven Benefit of Using Sure Start Sands with High Deformation Temperatures
