

For the Brick and Tile Industries

Advanced Materials

CHROMOX®

Vibrantz proudly offers CHROMOX®, carefully selected and sourced natural Iron Chromite ore which is engineered to meet specific requirements. As a through-the-body brick colorant, CHROMOX® is used in both the commercial and residential construction markets to color buff-color ceramic bodies to a cool gray or to color medium-iron bodies to a gray-brown. CHROMOX® can also be supplied as a slurry grade product and you can “just add water” to develop a stable slurry for liquid dosing for addition to red- or buff-burning bodies.

Your Vibrantz representative is able to carefully assess your manufacturing needs and identify the most suitable product to meet your individual requirements. Vibrantz’s team provides technical service support and on-hand assistance in plant trials to help improve your quality and performance.

CHROMOX® products are currently available in bulk (via pneumatic delivery), 2000 lb. supersacks and 50 lb. paper bags.

Full analysis and MSDS are available upon request.
