

A lasting impression and a powerful finish – The protective skin for interior and exterior use

## Decorative paints

Today, character is one of the keys to vehicle quality. Leaving behind standard solutions – exploring our customers' very specific needs and requirements. Functionality, shape and, especially, the colour increasingly give distinction to a car's inside and outside. From the radiator grille, hub caps, spoiler and wing mirrors right down to the handles, faceplates, covers and the many different control knobs and other operating elements on the inside – the cockpit.

This is where our paints provide a powerful finish! In numerous colours from matt to high-gloss or in metallic finishes or with a specific surface feel. As insensitive and resistant to external influences as necessary. Specifically tailored to automotive industry requirements and uses.

## Product variants

<b>Decor Paint 0883</b>	<ul style="list-style-type: none"> <li>• For large-surface parts</li> </ul>
-------------------------	---

**Hydro Nano Decor Paints and Hydro Nano Haptic Paints** are water-soluble and provide excellent cream and hydrolytic resistance.

They perfectly adhere to PC, ABS, and ABS/PC blends and passed compliance testing to all kinds of automotive industry specifications.

A very wide range of customer coating lines successfully deploy our decorative paints in series production.

Apart from their outstanding usage and processing properties, these hydro paints excel in their extremely high scratch resistance.

**Hydro Nano Haptic Paint** also provides a soft touch and feel.
